Databases: PostgreSQL, MongoDB, Mongoose, MySQL, Redis

AI Tools: Copilot, Cursor, Claude Code, Codex, Stitch, Gemini, Grok

Backend : Node.js, Express.js, NestJS, REST APIs, JWT, ZOD

UI & Styling : Tailwind CSS, Material UI (MUI), Ant Design, Shadcn UI, Sass, Framer Motion, GSAP, Radix UI, Headless UI

Tools & Testing: VS Code, Postman, Swagger, Jest, Vitest, React Testing Library

Version Control: Git, GitHub, Bitbucket

Professional Experience

Backend Developer, Softvence📁

2025 November – 2026 April

- Completed intensive training in TypeScript, Node.js, Express.js, PostgreSQL, Prisma, and Next.js.
- Built scalable backend systems with RESTful APIs, authentication (JWT, RBAC), and advanced CRUD operations.
- Designed optimized databases using RDBMS concepts, normalization, and complex SQL queries.
- Developed real-world projects, including Healthcare and Tour Management Systems
- Gained hands-on experience with Docker, Nginx, AWS, CI/CD pipelines, and automated testing (Jest, Supertest).

Web Developer, PPC Rockers 📁

2025 april – 2025 October

- Developed and maintained company websites using WordPress, ensuring performance, responsiveness, and user-friendly design.
- Customized WordPress themes and plugins to meet business requirements and improve functionality.
- Designed and built responsive landing pages for Google Ads campaigns and client projects, focusing on conversion and SEO.

Project

1. PARCEL-X: SMART PARCEL DELIVERY PLATFORM

ParcelX is a full-stack parcel delivery platform designed to provide a seamless, secure, and efficient door-to-door delivery experience. It enables users to create parcel bookings, track deliveries in real time, and manage shipments through an automated workflow system.

- Real-Time Tracking & Booking:** Users can create and manage parcel bookings, track deliveries live, and provide pickup/delivery instructions.
- Role-Based System:** Dedicated dashboards for Users, Admins, and Riders to manage bookings, assign deliveries, and update parcel status efficiently.
- Secure Payments & Delivery Management:** Integrated dynamic pricing, secure payment system, and rider assignment for optimized delivery operations.

2. AUTOBID: THE PREMIER ONLINE CAR AUCTION PLATFORM

AutoBid is a dynamic full-stack web application designed for a streamlined, secure, and engaging car auction experience. Users can list their vehicles for sale, and prospective buyers can browse, bid, and connect with sellers to acquire their next car.

- Car Listing (Add Task): Sellers can post a new car for auction, specifying details like Title, Category, Deadline, and Budget (Starting Bid) through a dedicated protected route.
- Complete CRUD Operations: Users have full control over their posted listings, allowing them to Create, Read, Update, and Delete an auction from the My Posted Cars protected route.
- Protected Routes: Essential pages like Add Car, Car Details, and My Posted Cars are secure, redirecting unauthenticated users to the login page
